

A photograph of a military vehicle, possibly an armored personnel carrier, with several soldiers on top. The scene is silhouetted against a bright orange sunset sky. The vehicle has multiple antennas and sensors on its roof. The soldiers are wearing helmets and gear. The overall mood is serious and operational.

GROUND VEHICLE SOLUTIONS

Rugged Recorders, Computers and Displays

TRUSTED INNOVATOR OF RUGGED VETRONICS FOR THE CONNECTED FORCE

Spectra Defense Technologies offers over half a century of rugged, mission-ready, battle-tested capabilities and products to solve the challenges of the modern battlefield. The company's integrated solutions span the data continuum and defense domains.

The Recorder, Integrated Processor, and Router (RIPR) series delivers flexible, low SWaP solutions for temporary or permanent sensor data acquisition, recording and streaming on mobile platforms. Any-to-any data routing and video compression, combined with precise packet timing, simplifies data analysis, while open standard data formatting prevents vendor lock and enables AI-driven analytics.

Spectra provides a wide range of rugged LCD displays for ground vehicles in various sizes ranging from 5.0" to 43", including sunlight readability and NVG compatibility. Various standard options include bezel keys, cold-start capability and rugged AR touch screens. Additionally, Spectra offers a suite of rugged peripherals, including NIAP-certified KVM switches and keyboards.

RUGGED. MISSION-READY. BATTLE-TESTED.

Spectra delivers comprehensive rugged vetronics for military ground vehicles. Our integrated solutions span the complete data continuum from capture and recording systems to mission computers, encrypted storage and rugged displays (5"-43").

Spectra provides battle-tested, low SWaP equipment including data acquisition units, video & data routing, GCIA/GVA-compatible processors and ruggedized workstations designed for the harshest battlefield environments.

End-to-end information products & systems, when it matters most,
Spectra is the solution.
